

Disaster Hospital Load Prediction & Patient Routing

Right patient → Right hospital → Right time → Better outcomes

AI-powered system to predict hospital load during disasters and route emergency patients to the best available hospitals in real time.

Save Lives
Optimize Resources
Build Resilient Communities

Key Technologies

Machine Learning
(Load Forecasting)

Real-time Data
(APIs & IoT)

Mapping & Geolocation
(Shortest Path / Routing)

Cloud Infrastructure
(Scalability)

Mobile App / Web Portal
(Alerts & Navigation)

Smarter Predictions.
Faster Response.
More Lives Saved.
